

Model MS600 Miniature Sensor

The MS600 sensor is among the smallest and lightest of all miniature sensors available. Measuring only 1/16" D x 1/16" H (4mm D x 3.5 mm H). Single ended, epoxy encapsulated. Peak frequency response at ~600 kHz (spectrum below). Ideal for applications such as hard drive head-disk contact

monitoring, and for applications on small parts. Supplied with cable lengths up to 10 ft (3 m) and coax BNC connector.
